

Smile Enhancements

"You haven't lost your smile at all, it's right there under your nose."

-unknown

Four Factors To A Beautiful Smile: Color, Contour, Alignment, & Shape

Color:

- _ Semi-Custom Trays (no impressions needed, 10-unit dose pack)
- _ Custom Trays (impressions taken for trays, use initially for 2+ weeks and then use as needed after first two weeks)
- _ In-Office Whitening

Alignment:

- _ Customized (Impressions taken for customized aligners. Both upper and lower arches are treated.)
- _ Removability (Remove aligners to eat, drink, brush, and floss.)
- _ Effective (Enjoy straighter teeth before your treatment is finished.)
- _ Comfort (Aligners rarely irritate your gums or cheeks.)
- _ Clarity (Virtually invisible aligners)

Contour:

- _ Safely remove layers of enamel in certain areas to instantly straighten your teeth.
- _ "Instant Orthodontics" done in a single visit.

Shape:

Bonding:

- _ One Time Visit
- _ Reversible
- _ Instant Results

Veneers:

- _ Multiple Visits
- _ More esthetic
- _ Non-reversible (in most cases)
